

# Customer Premises Equipments

Presented By: RIYA KHATUN

# What is CPE?

A customer-premises equipment or customer-provided equipment (CPE) is any terminal and associated equipment located at a subscriber's premises and connected with a carrier's telecommunication circuit at the demarcation point ("demarc").

# Why is CPE Important?

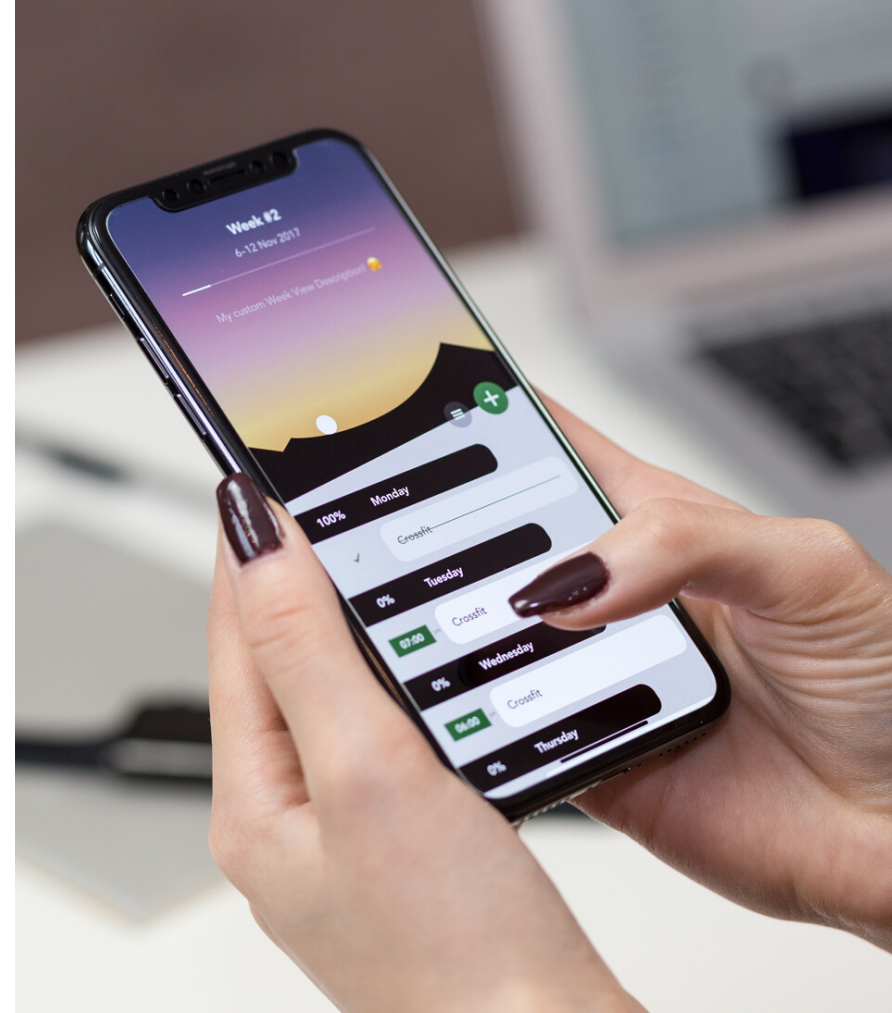

As trusted advisors, Certified Public Accountants advise their clients on a wide range of important accountancy issues. ... In order to ensure that CPAs provide the quality of advice and service that their clients depend on, CPE is vital.

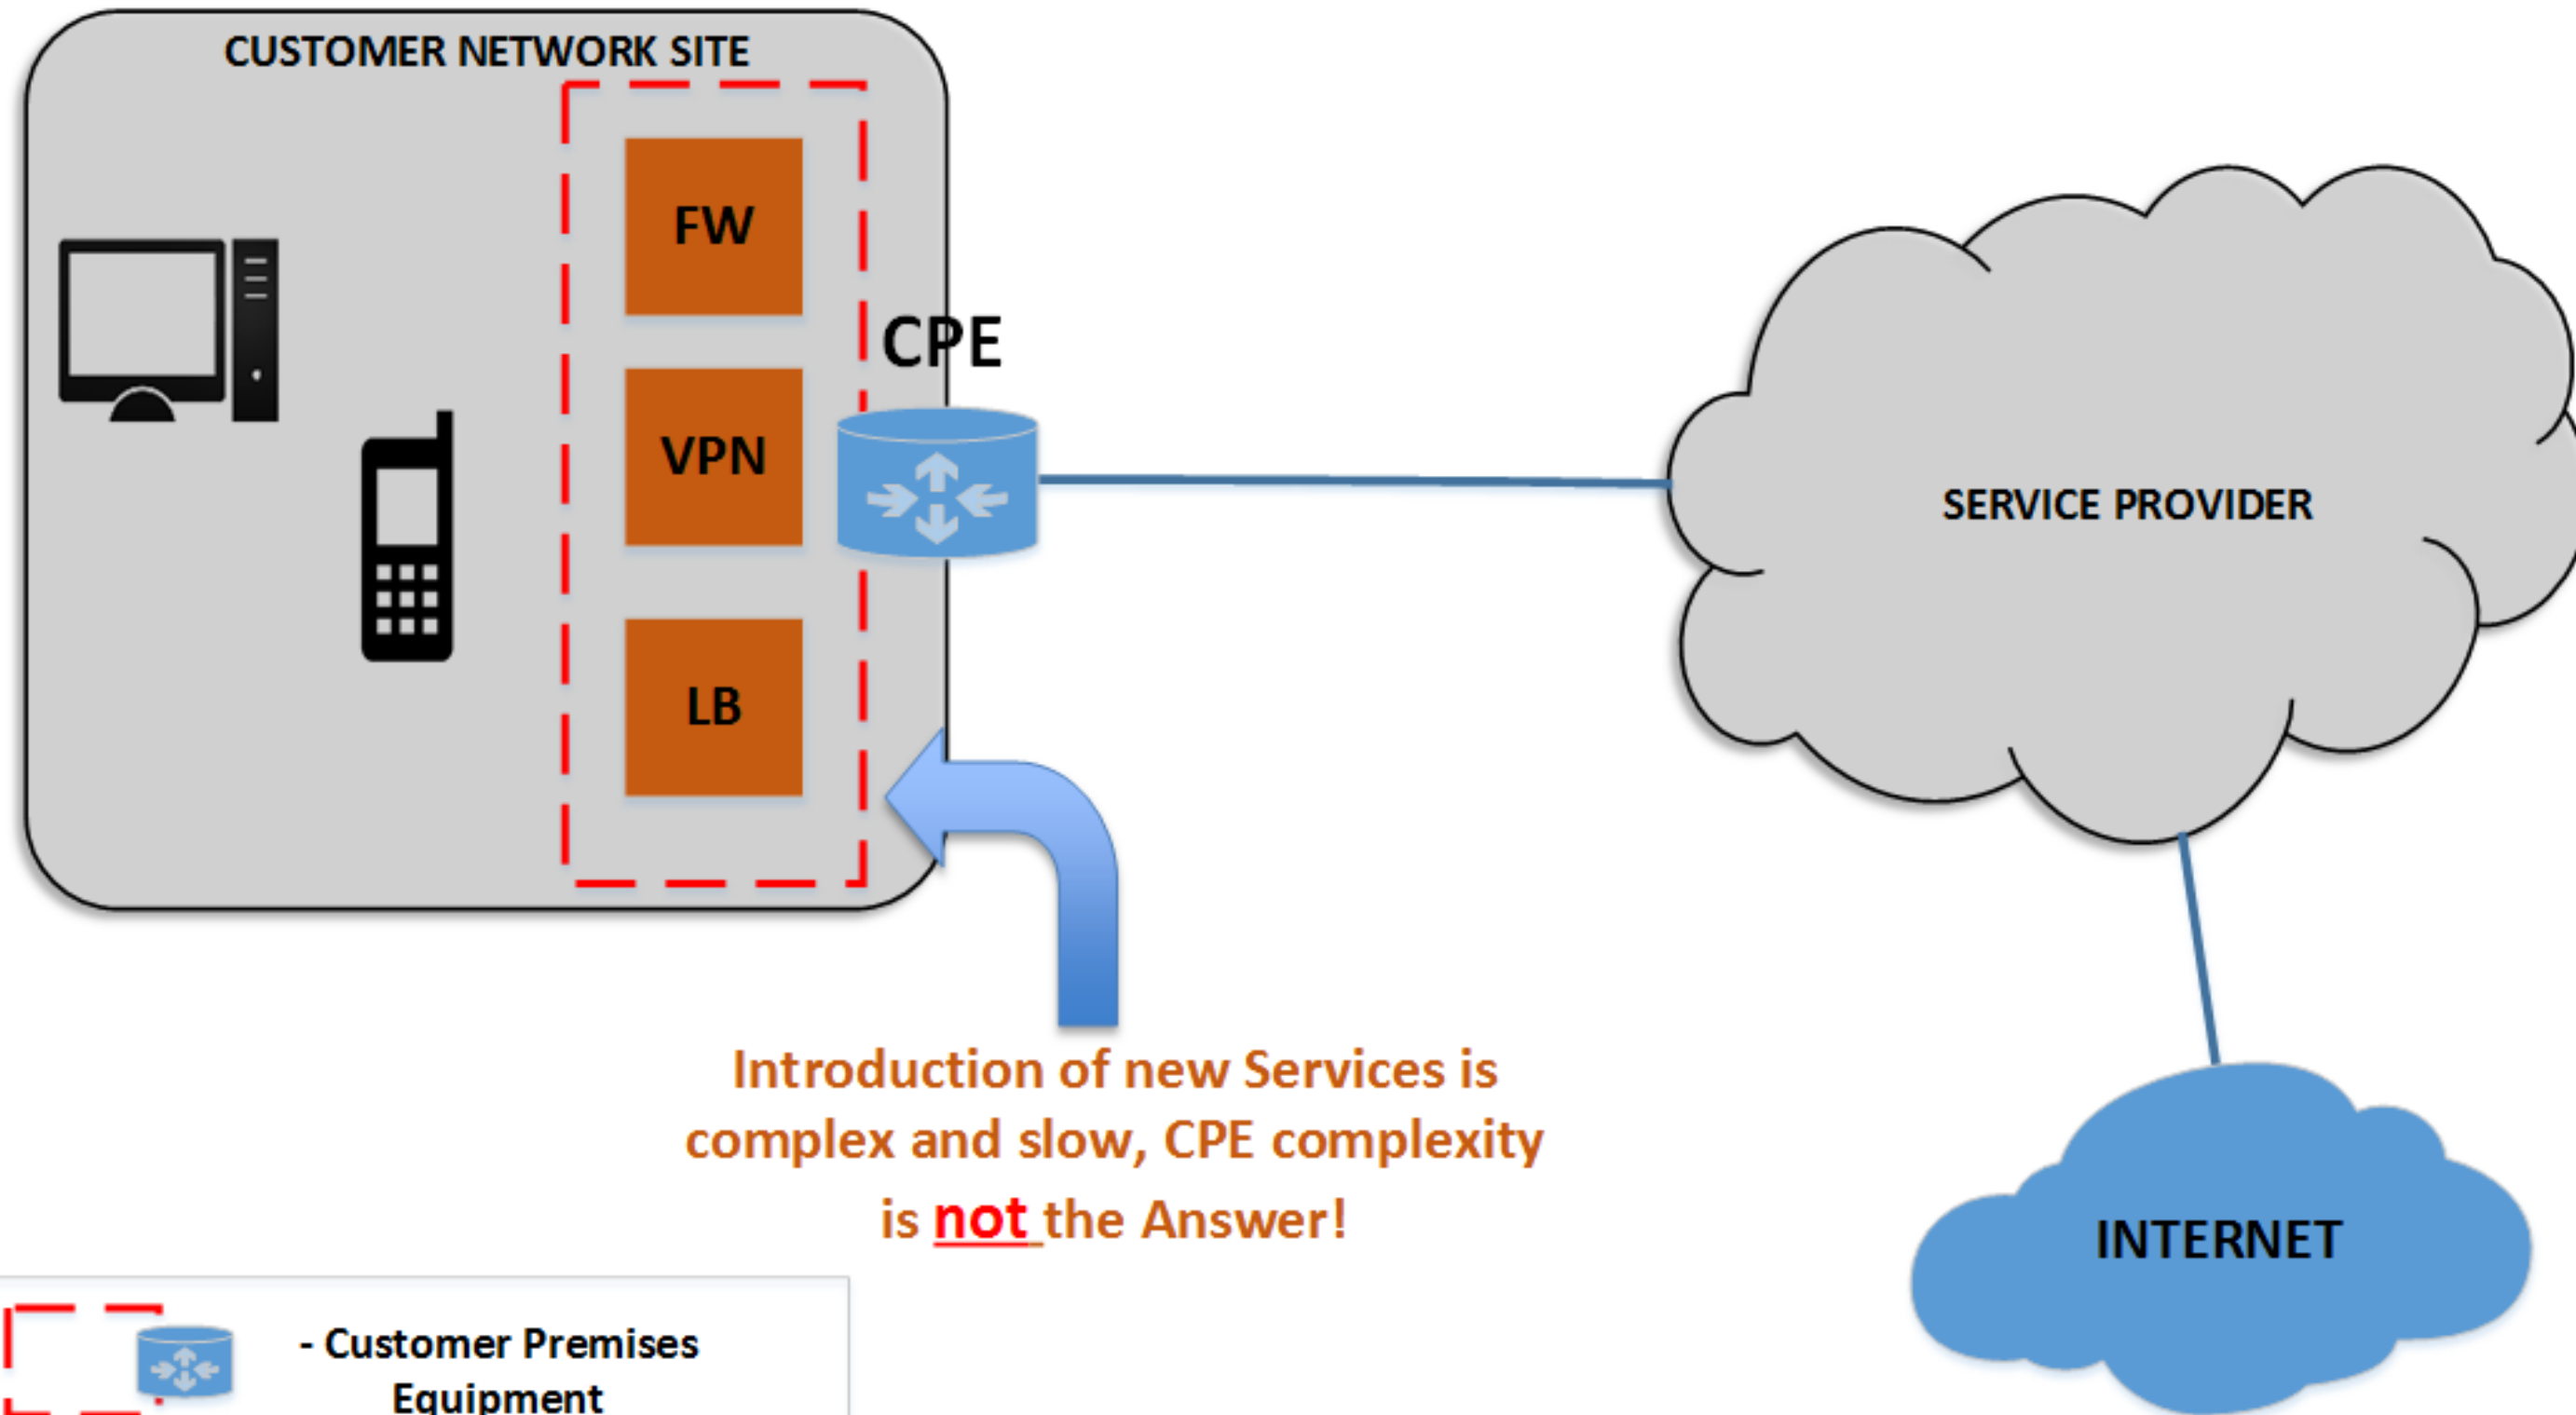

# WHAT IS CPE INSTALLATION?

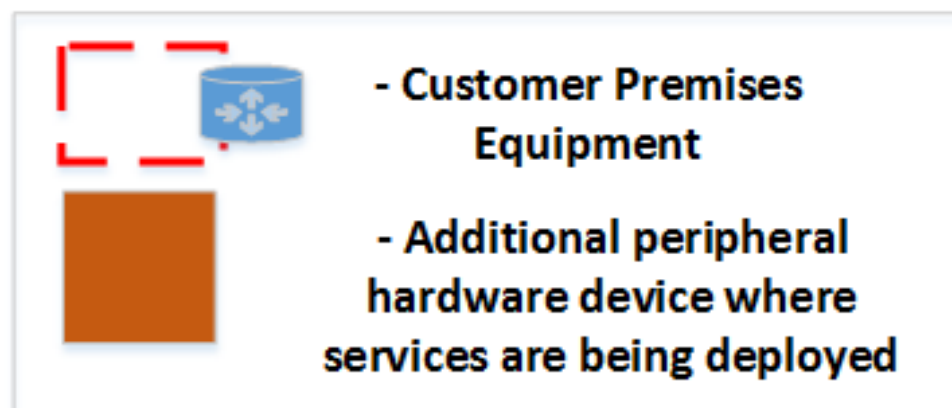

WA CPE device is telecommunications hardware located at the home or business of a customer. CPE is generally owned by the telecommunications provider, though some customers do choose to purchase modems or routers. Leasing or rental arrangements are also common, especially for cable television or broadband subscribers.

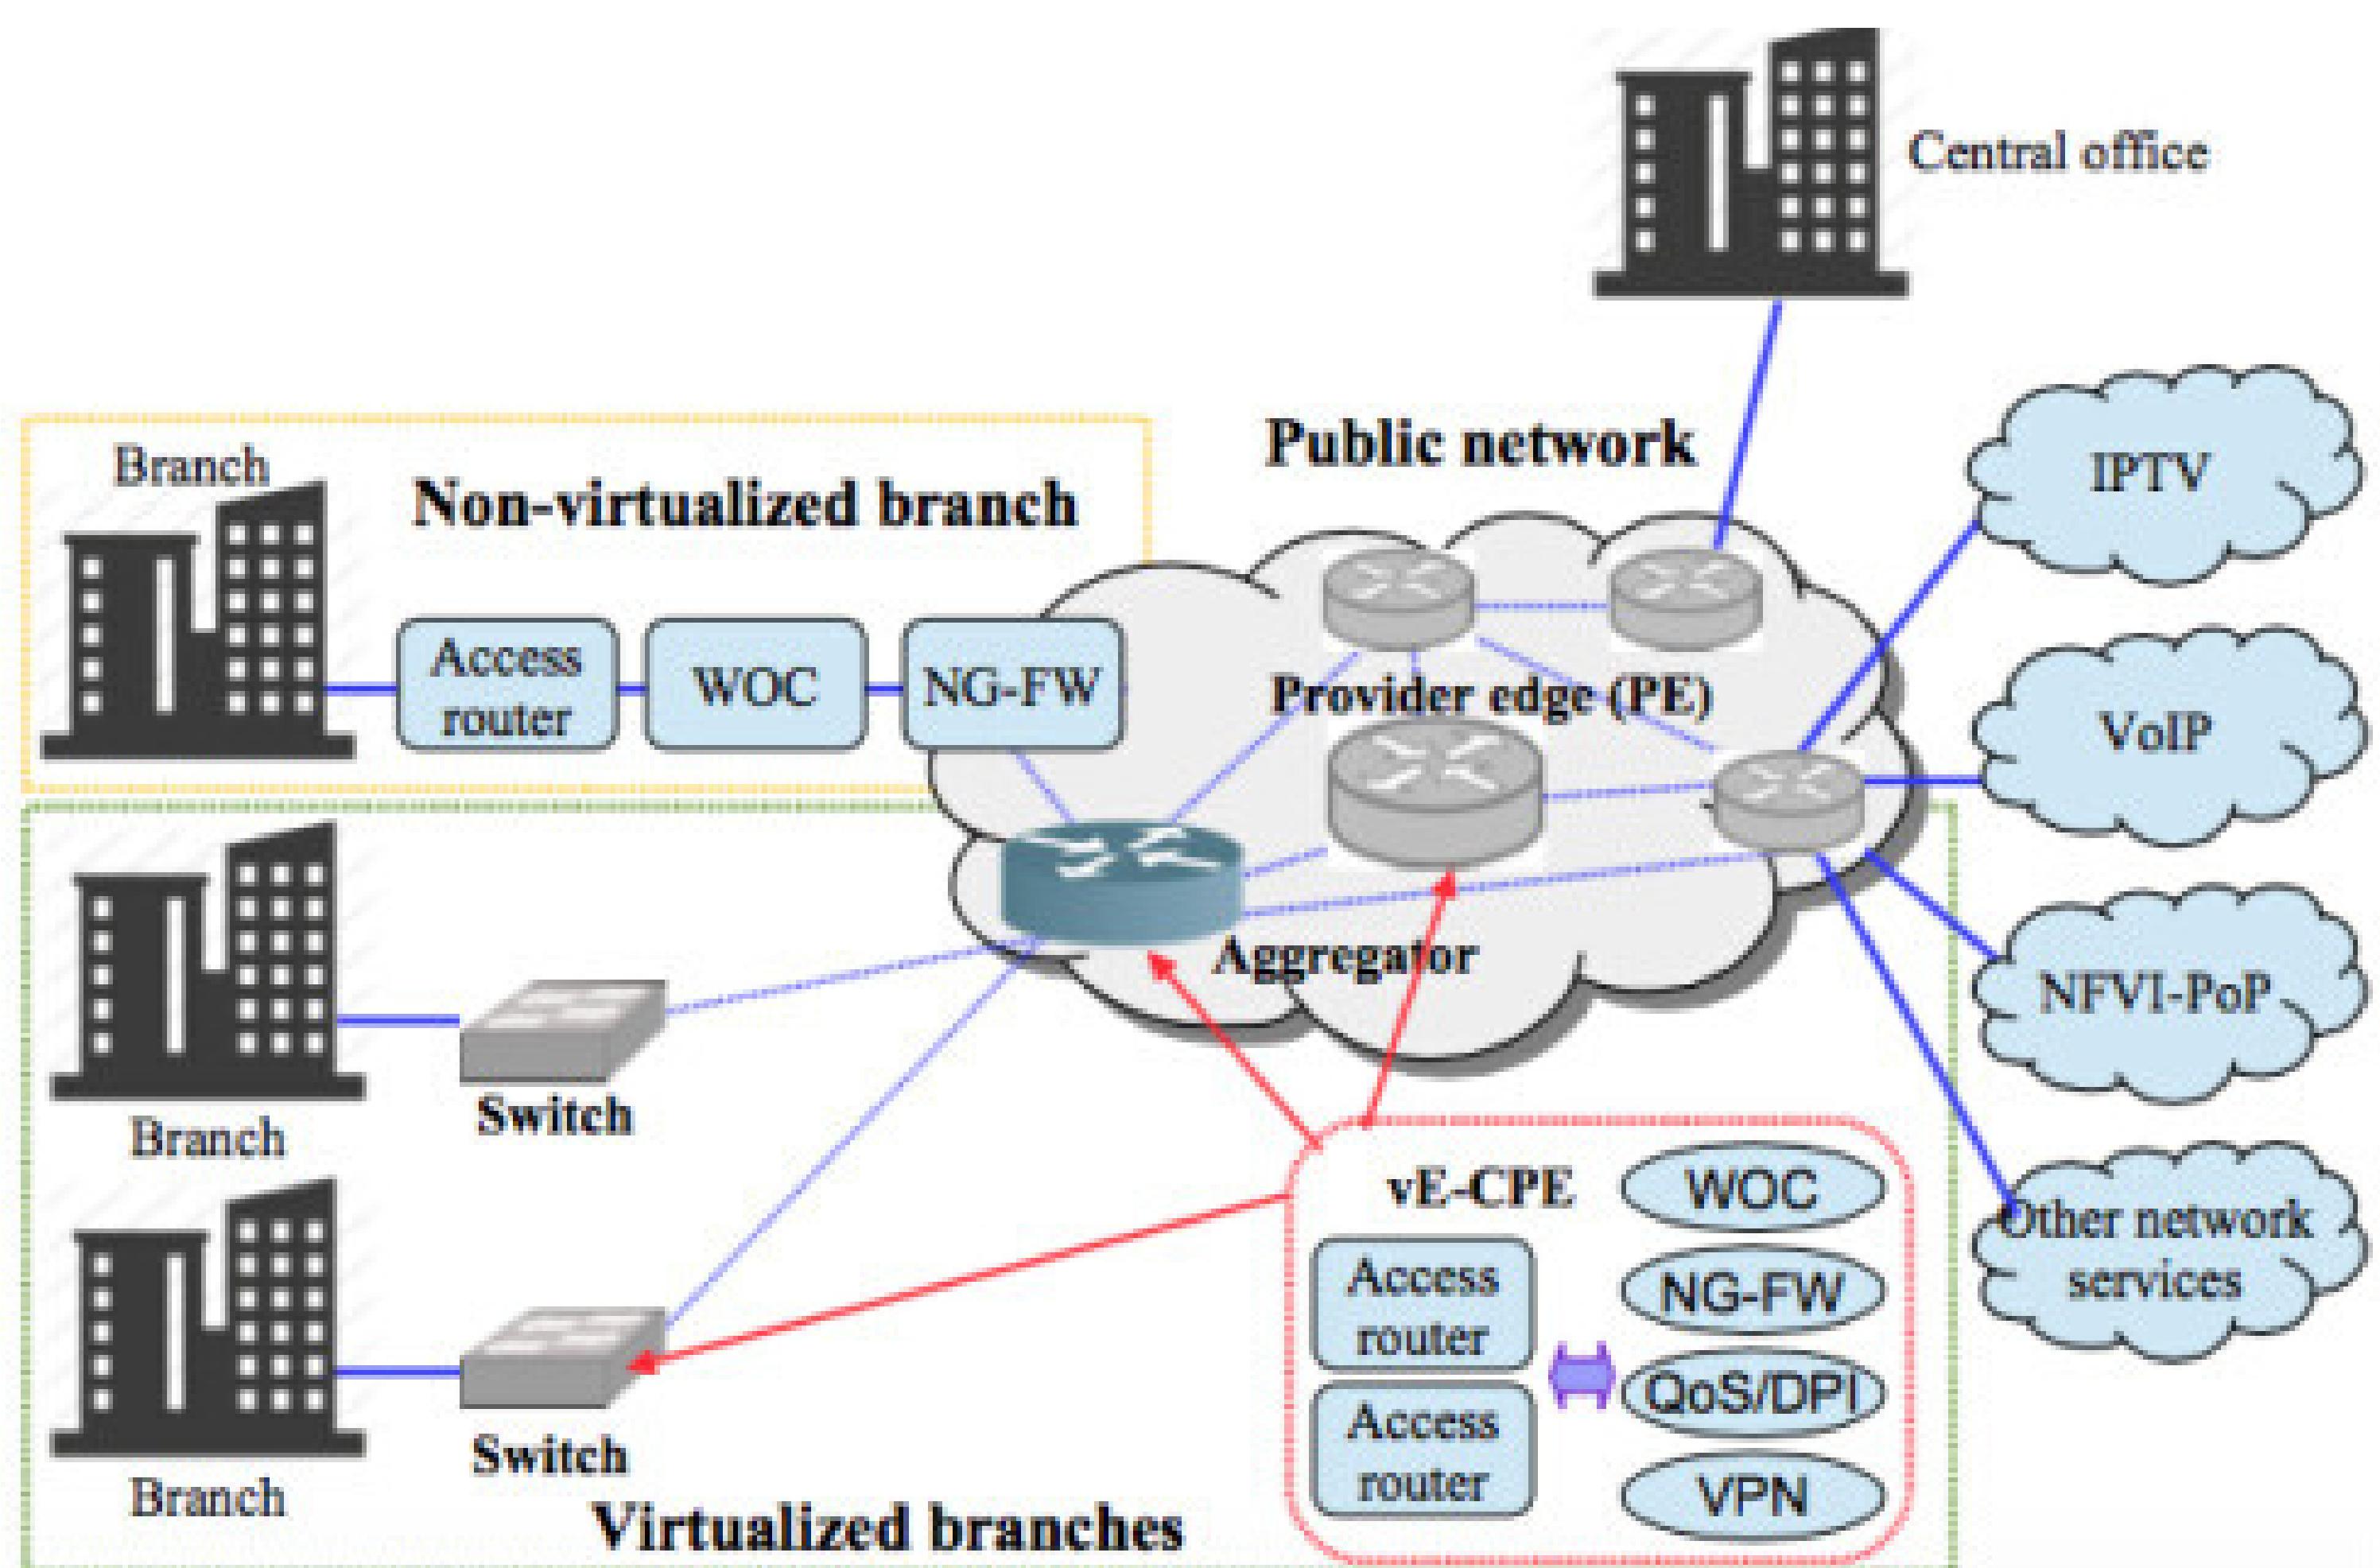

Introduction of new Services is complex and slow, CPE complexity is not the Answer!

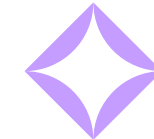

## The application areas for CPEs include:

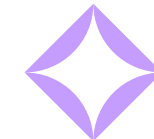

**VoIP**

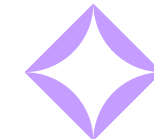

**Cable TV**

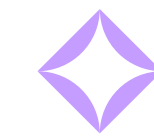

**LTE solutions**

**IoT equipment**

**Wireless  
connectivity**
